

A complete textbook, workbook and testing system designed to cover the broad scope of contemporary drug therapy. With 26 chapters, this book addresses new drugs and technologies, changes in regulations and reimbursement schedules, the ageing of the population and accomplishments of many clinical pharmacists. The chapters are not mere distillations of the current literature, but also include opinions based on clinical experience. The authors present their various approaches in an unbiased manner, while sharing their clinical judgement. The text includes: new chapters covering biotechnological therapy, transplantation, clinical pharmacokinetics, AIDS, geriatric drug therapy and burns; the workbook with case studies has been expanded to include over 200 cases; computerized test bank available to course instructors who adopt the book; and a teachers manual is available giving SOAP notes and answers to questions that are not included in the workbook.

H. G. Wells: Another Kind of Life, Talking To The Dead, Physical Education and Health Study Guide: Practice and Review, Christmas on Candy Cane Lane (Life in Icicle Falls), The Gardeners Practical Guide to Annuals, Bulbs and Perennials: An illustrated encyclopedia of flowering plants containing over 1500 beautiful colour ... directories of plants Illustrated catalogues, The Book of Water (Dragon Quartet), Engineering, Construction, and Operations in Space IV: Proceedings of Space 94/2 Volumes,
