

Sachdev provides a detailed examination of the psychological responses of women who have had abortions. The author surveyed a sample of unmarried women aged 18 to 25 who had had abortions during the past six months to one year. Based on in-depth interviews with these women, the study presents quantitative and qualitative findings. While some authors have stressed the negative psychological impact of abortion, Sachdev demonstrates that the majority of women in his study were comfortable with their decisions and experienced few adverse psychological reactions. Impressively researched, this insightful study persuasively refutes claims and myths such as: #NAME?
